

21st Century Sailor & Marine Safety & Injury Prevention

"What you do every single day in your professional life is dangerous enough, and we don't want to lose Sailors or Marines in their off-duty hours. While the trends are going in the right direction, we must ensure all our

personnel receive the training & support they need to work and live as safely as possible."

Having the safest and most secure force in the Department of the Navy's history is the main objective of the safety area of the 21st Century Sailor & Marine initiative.

Motor Vehicle Safety

Preventing driving while fatigued, distracted, or under the influence of alcohol or drugs.

Travel Risk Planning System (TRiPS)

Proven tool to help Sailors manage the risks inherent in long distance travel. Since August 2006, more than 380,000

TRiPS assessments have been completed fatalities.
